Our team is ready to discuss your crop-specific issues or any questions you have about our products. We will provide you with rapid, comprehensive and personalized support.

SAFE. PROVEN. EFFECTIVE.

For 25 years BioWorks has been helping customers in the horticulture and specialty agriculture markets to develop effective and efficient programs using products that are safe, proven and effective.

We are continuously reinventing the way our customers work by providing biologically based, integrated, safe solutions and programs.

INSECT CONTROL

BotniGard 22WP is a biological insecticide for the control of adult and immature stages of aphids, thrips, whiteflies and more.

SUPERIOR FORMULATION

BotaniGard 22WP contains the highest spore concentration in a Beauveria-containing insecticide. BotaniGard is versatile enough to use as a stand-alone, as a tank mix partner, or in rotation with other insecticides.

UNIQUE MODE OF ACTION

The applied spores infect directly through the outside of the insect's cuticle. Spores adhering to the host will germinate and produce enzymes that attack and dissolve the cuticle. This allows BotaniGard to penetrate the skin and grow into the insect's body.

A BIOLOGICAL INSECTICIDE (MYCOINSECTICIDE - WETTABLE POWDER)
